

Together, let's develop CCUS\*  
in France to accelerate the fight  
against climate change!

\*CO<sub>2</sub> capture, utilisation, and storage

# Who are we?

**A French non-profit association, a place for exchanges, information and initiatives between industrial and research stakeholders, to accelerate the development of CCUS technologies.**

## CCUS: CO<sub>2</sub> Capture, transport, Utilisation & geological Storage

The members of Club CO<sub>2</sub> share the conviction of the anthropogenic origins of global warming and the need to develop CCUS to help remedy it.

Indeed, CCUS is one of the key solutions to reduce CO<sub>2</sub> emissions and CO<sub>2</sub> levels in the atmosphere.

CCUS involves recovering residual CO<sub>2</sub> emitted during industrial processes, storing it deep underground to isolate it from the atmosphere, or reusing it to manufacture new products. It is also possible to remove some excess CO<sub>2</sub> from the air.

The CO<sub>2</sub> thus captured no longer accumulates in the atmosphere and no longer contributes to the greenhouse effect.

## The challenges for CCUS

**BEING DEPLOYED  
ON A LARGE SCALE**

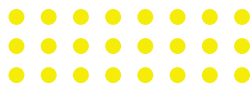

**CLARIFYING THE LEGAL FRAMEWORK**

**SUPPORTING THE DEBATE**

**ENSURING COMPETITIVENESS**

# Ambition

Catalysing French actions on CCUS by promoting national cooperation between the public and private sectors.

# Missions

**Objectively assessing the benefits of deploying CCUS** to help achieve carbon neutrality by 2050.

**Encouraging initiatives and the emergence of actions and projects** contributing **to the development of CCUS technologies.**

**Informing** and **raising awareness** among all stakeholders about the development of CCUS technologies and the societal challenges in this field.

**Encouraging and nurturing a comprehensive and consistent reflection** between the CCUS actors and all stakeholders.

Capitalising on and **disseminating knowledge** among the CCUS players and to the outside world, including the general public.

**Interacting with** European, national and regional **public authorities** (information, funding, incentive policies and regulatory framework).

## They joined us

More than 50 members joined the CO<sub>2</sub> Club:  
entire list with this QR code or visit the **Club-co2.fr** website.
